

Bedroom Planning Guide

There's a lot to consider when planning your new bedroom, as not only is it where you sleep, it's where you store all your clothes, shoes and possessions, so it's extremely important to get the balance right between storage requirements and tranquillity, so that you can enjoy a restful night's sleep.

Like our kitchens, all of our bedroom furniture is handmade for you and your home and we have all manner of storage solutions to help meet your demands. Meaning we can create bespoke storage for your shoes, hats, ties, belts jewellery and even your television.

Take time to think about what you need from your bedroom. The amount of storage required and the type of storage – whether it's for shirts, trousers, suits, long coats/dresses. Then look at your room, its size, is it a light room, how many windows are there? Then think about the style and colours you like. Collect pictures from magazines, colour swatches, fabric samples etc - keep them in a folder and bring them with you when you visit our showroom.

The guide has a number of questions relating to the different types of storage required in a bedroom. You may not need to answer them all they simply act as a prompt to help you cover all potential aspects that may be required in your project.

If you prefer, we would be happy to take you through the guide, so please feel free to telephone us on 0161 620 4123 or just pop into the showroom.

We look forward to seeing you soon.

Kindest regards

Mike & Anna
